

Everyday Solutions®

EveryWhere® Lite | Easy-to-use Automatic Vehicle Location (AVL) Viewer

Provides school administrators and other managers outside of the transportation department with a **quick and easy way** to find the **actual** location and status of buses through **reports and maps**.

CHALLENGE

To find a simple way to display complex GPS information on maps and in database reports.

SOLUTION

Use a Web-based solution that provides GPS maps and report through a simple user interface.

KEY CAPABILITIES:

Live Tracking:

Track the real-time location of selected buses or your entire fleet on Web maps.

History:

Specify the date and time to analyze any bus or the entire fleet and see the results on a Web map.

Maps:

View the location of buses in *map, satellite, hybrid* or *terrain* views. Use pan and zoom controls to examine fleet information up close or from a bird's eye view.

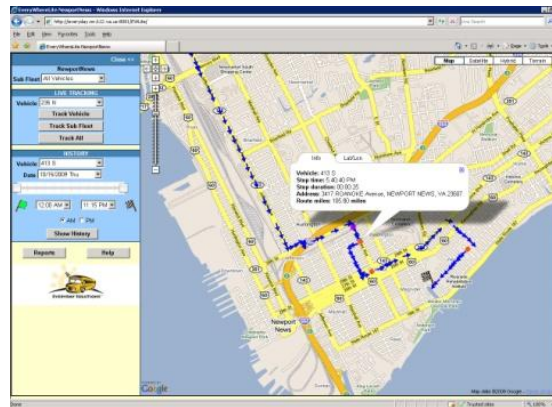

Performance Measurement Reports:

Empower users to analyze fleet information on-demand and visualize real-time and historical data. Users can run reports on selected buses and use run-time variables such as speed threshold, idling burn rate, etc. to get the information they need to make informed decisions.

“EveryWhere® Lite is fast and easy for us to learn and use. I provide it to my assistance principals so that they can answer their own questions about our buses. – win-win”

SubFleet:

Configure buses into groups to simplify the management of your fleet. You can specify an unlimited number of subfleets and a bus can be in any number of subfleets. Example: buses can be grouped by schools serviced, age of vehicle (planning replacements), bus lot location, etc.

Everyday Solutions, The Only Complete Student Transportation Information Solution

Every **Bus** Counts!

Every **Student** Counts!

Every **Dollar** Counts!

EXAMPLE REPORTS FROM EVERYWHERE®LITE

BUSES | Vehicle Activity Summary

Contents: Reports a fleet summary of each vehicle's running time, number of stops and miles driven for the selected date.

Usage & Benefits: Run this report when you need an overview of your whole fleet's activity.

BUSES | Vehicle Activity Detail

Contents: Reports stop information and ignition activity for the selected buses and date.

Usage & Benefits: Run this report to find out when the bus was running, where it stopped, how long it was stopped for, how far it traveled between stops and which 8-ways were used at the stop. This report can be used to determine compliance to state mandated safety light usage.

BUSES | Vehicle Stops

Contents: Reports every stop the vehicle made for each selected vehicle on the specified date.

Usage & Benefits: Run this report to see only the stops for the bus, including: time, location, duration and sensors. Scan the duration column to find where excessive time is being spent at a stop. Scan the sensor column to look for consistent usage of the 8-ways.

BUSES | Vehicle Info

Contents: Reports the status of the fleet's GPS units for the selected date.

Usage & Benefits: Run this report for a quick view of the installation and operational status of GPS units

BUSES | Idle Summary

Contents: Reports total idle time for each vehicle in the fleet, and estimates the cost of idling fuel consumption and the emissions produced during idling

Usage & Benefits: Run this report to determine which buses to focus on to reduce the costs of idling. Use the Emissions Calculator by inputting specific bus/engine emission ratings to determine your 'green level'. Run the Fleet Graph to visualize the distribution of excessive idle time of the entire fleet. Use this info to 'zero-in' on the best opportunities to save fuel and reduce emissions.

Vehicle	Total Excessive Idle Duration	Excessive Idle Occurrences	Cost (\$)	CO ₂ Emission (g)	NO _x Emission (g)	HC Emission (g)	CO ₂ Emission (lb)	PM Emission (g)
301	00:10:24	1	0.71	7.4	19.8	1.9	100.0	0.1
305	00:12:50	1	0.83	8.8	23.3	1.7	120.4	0.1

Total	43:18:57	67	188.93	1775.9	4721.4	346.5	26324.4	16.2

BENEFITS

- View actual bus movements with an intuitive user interface that is simple to teach and learn.
- Run reports and view Web maps of your fleet on-demand
- Access historical information about your fleet when needed including location, date and time stamps.
